The Town of Clinton is offering to engrave Bricks on the Clinton Walkway being constructed between Main Street and the Parking Lot on Lower Center street. This walkway is intended to improve the current path which suffers from poor drainage and is a challenging entryway for many including the handicapped. This also allows the town to establish another leg in our downtown beautification and sidewalk renovation projects.

The Town is committed to improving the infrastructure in a cost effective manner and we do that by enhancing this entryway to our businesses by providing engraved pavement bricks with local family names and names of loved ones. This is a wonderful way of being remembered in the historical town and assisting in adding to its beauty. The purchase of bricks is not limited to local townspeople, as the surrounding towns are also a part of our community that shop and enjoy the beauty of our Town center.

The pavers will cost \$100 and orders can be placed at the Municipal Building. Please contact Town Clerk, Ceil Covino at 908-735-8616 to place your request. The funding from your purchase will go towards the walkway project. In addition there will be a park bench available to be engraved for \$750. Bricks are limited in quantity so please order early so we can place the engraving order in time for the Spring construction project to begin. Send to: Town of Clinton, P. O. Box 5194, Clinton, New Jersey 08809. Checks payable to Town of Clinton.
