TOWN OF CLINTON

Recycling, Garbage & Brush

Recycling is Changing

The Town of Clinton has a proud history of recycling. However, market forces have changed the recycling industry, and it is changing how we need to recycle. The two largest markets for our recycled items, China and India, have stopped buying our recycling. The remaining buyers can be picky on the quality and are rejecting contaminated recycling loads.

What is Recycling Contamination?

Recycling Contamination is when incorrect items/materials are put into the system or when the right items/materials are prepared the wrong way (i.e. food and drink residue in containers, recyclables in plastic bags, grease on pizza boxes, shrink wrap on cardboard...and much more)

Why Recycling Contamination Matters

When the occurrence of contaminants in a load of recycling becomes too great the items will be sent to the landfill even if most of them are viable for recycling. The Town of Clinton pays 50% more when recycling loads are contaminated, adding tens of thousands of dollars to our costs.
